## **Patco #16 Spray On Oven Cleaner**

**Do Not Use Near Food or Food Contact Surfaces. KEEP AWAY FROM CHILDREN! Avoid Contact with Oven Temperature Probes, Aluminum, Paint, Linoleum, Floor Tile, Plastic, Copper or Light Bulbs.**

Patco #16 Oven Cleaner is an industrial grade institutional cleaning product. Please Read And Follow All label Directions Before Use. Shake can before use.

- 1) Product may be used on either a warm or cold oven. For warm cleaning heat oven to 200 degrees. Once oven reaches 200 degrees turn oven to OFF, extinguish pilot light if applicable.
- 2) Remove interior racks.
- 3) Hold can upright and position it 8-10 inches from surface to be cleaned. Cover interior with foam, starting at the top. The no-drip foam is made to stick to vertical surfaces. Do Not spray product into open area surrounding fan blades or on light bulb.
- 4) Leave oven door open. For warm surface let stand 5-10 minutes, for cold surface let stand for 10-20 minutes.
- 5) Once clean, rinse thoroughly with fresh water until oven cleaner is completely removed. Clean and replace racks. Reheat oven to 200 degrees before reuse.
- 6) This product is made to clean without scraping! Can be used on Ovens and Griddles to remove grease and charred residue.

**WEAR GLOVES While Using this Product!**
