

# **"HOT SHEET"**

## **Patco #61 Protect All Cleaner and Protectant.**

**Patco Recommends That While Cleaning Near Food or Food Contact Surfaces, Always Use the \*Controlled Spray\* Method. Hold the nozzle of the spray bottle next to a disposable paper towel to wet towel for cleaning. Do not spray directly on surface to be cleaned. This keeps the spray from drifting onto food or food contact surfaces. KEEP AWAY FROM CHILDREN!**

**Protect All works much the same way as Armor All®. It can be used in a number of different ways.**

**Clean soiled plastic trash containers with Patco #60 Citrus scrub and then Apply Protect All to shine and protect surfaces.**

**Spray Protect All on a clean dry disposable cloth and wipe plastic sneeze guards, ice cream display case coverings and any plastic or plexiglass non food contact surfaces to clean, shine and hide small scratches. Protect All also works as an anti static agent to help keep dust from settling on these surfaces.**

**Clean gas pump hoses with Patco #60 Citrus Scrub and then apply Protect All to the hoses to keep them from cracking and dry rot. Patco #61 Protect All blocks harmful ultraviolet rays from the sun.**

**Protect All cleans and protects rubber gaskets and door seals in both large and small coolers (glass door seals in the walk in cooler, door seals on small refrigerators). Keeps gaskets soft and pliable which saves money by allowing the more efficient gaskets to keep cold air contained.**

**Spray on paper towel and hand soap dispensers in restrooms, by hand wash sinks and at gas islands to clean, shine and protect.**
